

Inbolt is the pioneer of AI robot guidance solutions, trusted by brands like Stellantis, Toyota, Beko, and Ford. Our system combines real-time 3D vision and AI, enabling robots to adapt on the fly to dynamic environments, such as moving lines or cluttered pallets. With the fastest refresh rate in the industry, Inbolt delivers precise part localisation and real-time trajectory adjustments, even in challenging conditions. Our AI, trained on CAD models in under 5 minutes, integrates seamlessly with FANUC, ABB, KUKA, Yaskawa and Universal Robots, enabling scalable, flexible automation without costly sensors or rigid setups.
